TCI Logo Story
We created our logo to symbolize Transitions Centers’ service to our members. We work on a variety of skills to help our individuals reach their goals – including confidence and independence. We provide numerous opportunities for members to explore and engage in their world, develop skills necessary for success, and feel empowered.

The interconnecting T and C (for Transitions Centers) represents movement and activity – a fundamental principle at Transitions. Most of our members participate in diverse activities outside of our center, where members access a wide range of choices to
• improve their community involvement,
• find work that matches their skills and interests, and
• attain more confidence and competence in the community.

The hexagon is found throughout nature and symbolizes harmony and balance. Through Transitions Centers’ programs, our members develop the skills necessary to connect with the community in harmony and balance.
